# **INTERIM REPORT**

#### SHAREHOLDERS AND TREND OF FIDIA SHARES

FIDIA S.p.A. is listed at the Italian Stock Exchange under the STAR - High Requirement Securities Segment - Index. The following chart shows share price performance from 1 January 2017 to 5 September 2017.

In the first half of 2017 the number of ordinary shares, equal to 5,123,000, was unchanged compared to 31 December 2016.

The holders of ordinary shares at 14 September 2017 are:

Giuseppe Morfino No. 2,865,516 equal to 55.93%;

Market No. 2,247,484 equal to 43.87%;

Own shares No. 10,000 equal to 0.20%.

No categories of stock other than ordinary shares or bonds were issued.

#### **ECONOMIC AND FINANCIAL PERFORMANCE OF THE GROUP**

The first half of 2017 was characterised by revenues of €17,329 thousand, down (-35.8%) from the result recorded at the end of the first half del 2016 (€26,985 thousand).

The operating margins which in the second quarter of the period improved significantly are affected by the negative performance in the first quarter.

Sales performance, also in the second quarter, remained satisfactory, and overall in the first half of the year new orders were much higher than the performance recorded in the same period of 2016, totalling €26,001 thousand compared to €16,736 thousand in the first half of 2016 (+55%).

More specifically, the reclassified income statement of the first half del 2017 compared with that of the first half of 2016 is as follows:

| (€thousand)   | 1st Half 2017 | %      | 1st Half 2016 | %      |

#### ANALYSIS OF ECONOMIC TRENDS

#### Revenues

The first half of the period reported revenues of €17,329 thousand, down 35.8% YOY.

The trend is due to the mechanics segment (HSM) which recorded revenue of €9,652 thousand compared to €18,605 thousand of the first half of the previous year (-48.1%), to the electronics segment (CNC) and Service segment which reported lower results compared to the first half of 2016 with revenue at €1,691 thousand (-6.7% compared to €1,812 thousand at 30 June 2016) and €5,986 thousand (-8.9% compared to €6,568 thousand at 30 June 2016) respectively.

The trend is mainly due to the significant and temporary drop in machine production due to the completion of the move to the new production plant as well as to the level of orders recorded at the end of 2016.

The revenues trend per business line is shown in the table below:

| (€thousand)                             | 1st Half 2017 | %     | 1st Half 2016 | %     |

#### Numerical Control and Software

The revenues of the electronic segment are down by 6.7% compared to the 1st half of 2016 at €1,691 thousand versus €1,812 thousand in the same period of last year.

#### High-Speed Milling Systems

The high-speed milling systems revenue (HSM) showed decreased revenues compared with that recorded the previous year, reaching a total value of €9,652 thousand compared to €18,605 thousand of the first half of 2016 (-48.1%)

#### After-sales service

Revenues of the Service segment, which comprise revenues from the after-sales service, from the sale of spare parts and from scheduled maintenance recorded a decrease (-8.9%) compared to the same period of last year, amounting to €5,986 thousand (€6,568 thousand al 30 June 2016).

#### Sales and marketing activity

Commercial activity in the first half of the year was very positive and the trend continued in the third quarter.

The following tables show the trend in the backlog orders and in the new orders in the two periods under consideration.

With reference to the Service segment the commercial data (new orders and order backlog) will not be shown because they almost match with the revenues as the time to fulfil the intervention requests is very short.

|                       | TOTAL     | TOTAL     | Chg.   |

| New orders            | 26,001    | 16,736    | 55.4%  |
| Revenues              | -11,343   | -20,417   | -44.4% |
| Order backlog at 30/6 | 29,265    | 27,246    | 7.4%   |

#### Other revenues and income

Other revenues and earnings in 1st half 2017 were equal to €1,143 thousand (€978 thousand in the same period of 2016). This figure includes the other revenues from ordinary activity, but that cannot be included in the typical sale of goods and services.

This item includes:

- release of the warranty, bad debts and/or any accruals in excess of the risk to be covered (€468 thousand versus €296 thousand at 30 June 2016);
- increases in tangible assets built on a time and materials basis and the capitalization of product development costs (€283 thousand versus €180 thousand at 30 June 2016);
- recovery of costs, contingent assets and other sundry revenues (€252 thousand; €231 thousand in the same period of last year).
- research grants from the EU and Italian Ministry of Education, University and Research (MIUR) as part of the funded research activity carried out by the parent company Fidia S.p.A. (€134 thousand, €264 thousand at 30 June 2016);
- capital gains from disposals of tangible assets (€6 thousand versus €7 thousand at 30 June 2016).

## Value of production

In the first half, the value of production (consisting of net revenues, changes in inventories of finished goods and WIP and other revenues and earnings) decreased compared to the same period of 2016 (€22,588 thousand versus €31,083 thousand of 30 June 2016) due to decreased revenue.

## **Commissions and transport**

These items amounted in the first half to €769 thousand, down from €1,330 thousand in the same period of 2016 as a result of cost saving measures adopted in recent years and of the changed geographical mix of sales.

#### Contractors

This item totalled €1,241 thousand in the first half, down compared to €2,099 thousand in the same period of 2016, mainly due to the lower volume of revenues recorded in the first half of 2017 and decreased as a percentage of revenues (5.5% compared to 6.8% in the first half of 2016).

# Other services and operating costs

This item amounts in the first half to €5,188 thousand and is almost in line with the €5,398 thousand in the same period of 2016.

#### Added value

Added value decreased in absolute terms (from €11,087 thousand at 30 June 2016 to €6,844 thousand at 30 June 2017), mainly due to lower revenues and worsened as a percentage (30.3% compared with 35.7% in the same period of 2016) thanks to the low value of production achieved and the incidence of fixed costs (such as other operating costs).

#### Personnel

The following tables show the workforce average trend and cost of labour.

|   | 1st Half 2017 | 1st Half 2016 |
|---|---------------|---------------|
| Executives  | 8             | 8             |

| Labour cost (€thousand) | 9,001         | 8,831         |

| Abs. change | % Chg |
|-------------|-------|
| 170         | 1.93% |

Personnel costs increased by €170 thousand compared to the first half of 2016 (+1.93%), mainly due to the inflation rate and in Italy to the renewal of the national collective labour agreement. The percentage of personnel costs compared with value of production increased from 28.4% at 30 June 2016 to 39.8% at 30 June 2017 due to decreased value of production realised.

#### **EBITDA**

EBITDA was negative at -€2,157 thousand (+€2,257 thousand at 30 June 2016).

# **Operating profit from ordinary business**

The operating result of ordinary operations as at 30 June 2017 was also negative, amounting to - €2,680 thousand, compared to a positive result of €1,849 thousand at 30 June 2016.

This result was affected by the higher depreciation of fixed assets compared to the first half of 2016 (+€100 thousand), mainly related to the depreciation of two development projects (€54 thousand) and to the depreciation of the new building in Forlì (€31 thousand), which began on 1 June 2017.

#### Non-recurring revenue

In the first half of 2017 there were no non-recurring revenue or expenses, as was the case in the same period of 2016.

#### **EBIT**

Due to the lack of non-recurring items, EBIT at 30 June 2017 was equal to trading profit and was negative at €2,680 thousand (at 30 June 2016 it was positive at €1,849 thousand).

# Finance charges and revenue - Net exchange rate differences

Charges for financing activities were better compared with those of the first half del 2016 (net charges of €26 thousand at 30 June 2017 versus €113 thousand of the same period of the previous year). Net differences in exchange rates, either realized or resulting from measurement in the financial statements, generated net revenue of €146 thousand versus a net profit of €201 thousand at 30 June 2016.

# **Earnings before tax (EBT)**

EBT resulted in a loss of €2,560 thousand versus a profit of €1,937 thousand at 30 June 2016.

# **Profit (loss) of Group**

Group loss for the year after tax of €212 thousand and after losses of NCIs (€78 thousand) amounted to €2,694 thousand versus a profit of €1,230 thousand in the first half of 2016.

# **CONSOLIDATED STATEMENT OF FINANCIAL POSITION**

The Group reclassified statement of financial position was as follows:

At 30 June 2017 the net financial position was negative at €9,483 thousand; the change from 31 December 2016 was negatively affected by the increase in working capital and specifically of inventory, in addition to a lower level of revenues and receipts, as well as to increased borrowings for the construction of the new plant in Forlì.

The following table contains a condensed cash flow statement at 30 June 2017 showing the cash flows composing the net financial position.

#### **ALTERNATIVE PERFORMANCE INDICATORS**

In this Report, in addition to conventional IFRS financial indicators, a number of alternative performance indicators have been provided to allow better assessment of the economic and financial trends.

Said indicators, which are also found in the Directors' Report of other periodic reports, do not replace in any way whatsoever the mandatory IFRS indicators.

Below follow the alternative performance indicators used by the Group and the related explanation of their content and basis for calculation:

- EBIT,
- EBITDA ("Earnings Before Interest, Taxes, depreciation, amortization and write-downs"), which is the sum of the EBIT as per the financial statements, the item "Depreciation/amortisation of fixed assets" and the item "Bad debts provision";
- EBT (Earnings before tax);
- Adjusted EBITDA, EBIT and EBT: these are the same alternative performance indicators net of non-recurring items. At 30 June 2017 these indicators are the same as the non-adjusted but without non-recurring items.
- "Value of production", which is given by the algebraic addition of the items "Net revenue,"
   "Other revenue", and "Changes in inventories of finished goods and work in progress."

The comment of the alternative performance indicators is provided in the paragraphs above.

Below follow indicators relating to the financial structure and to the economic and financial situation:

#### FINANCIAL RATIOS

#### **INVESTMENT MIX RATIOS RATIOS** 30 June 2017 31 December 2016 1) Weight of fixed assets Capital assets 14,744 13,625 25.50% 23.40% Total assets 57,746 58,319 2) Weight of working capital Current assets 43,002 44,694 74.50% 76.60% Total assets 57,746 58,319 LOAN MIX RATIOS **RATIOS** 30 June 2017 31 December 2016 1) Weight of current liabilities Current liabilities 27,531 25,152 63.20% 63.90% Total liabilities (except net 43,572 39,381 equity) 2) Weight of non-current liabilities Non-current liabilities 16,041 14,229 36.80% 36.10% Total liabilities (except net 43,572 39,381 equity) 3) Weight of own capital

The analysis of the invested capital mix indicators shows a prevalence of short-term net assets in the total assets. This result is basically consistent with that of previous years. The loans mix indicator shows:

59.90%

18,938

26,350

71.90%

• a prevalence of short-term loans, which is consistent with the level of investing activities;

14,174

23,680

• a reduction in the hedging of net invested capital with own capital, due to a worsening of net financial payables/receivables in the first half of 2017.

| Short-term assets Short-term liabilities | $\frac{33,360}{21,988} = 1.52$ | $\frac{35,769}{20,535} = 1.74$ |

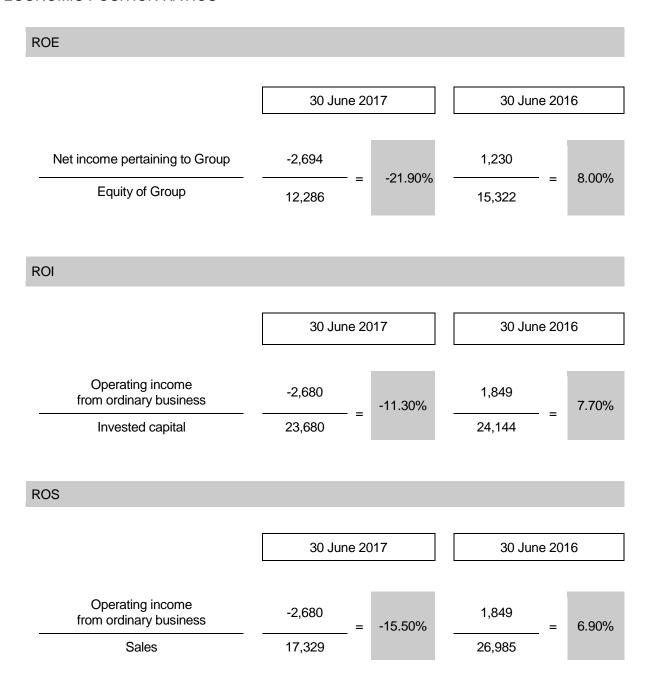

The analysis of the financial ratios shows a substantial balance between sources and releases in line with the previous fiscal year.

In particular, the liquidity ratio shows the Group's ability to easily meet short-term financial obligations, considering the prevalence of current assets over current liabilities.

The capital assets coverage ratio shows strong coverage of capital assets with own funds.

Finally, the cash ratio shows a short-term prevalence of current assets over current liabilities of the fiscal year.

## **ECONOMIC POSITION RATIOS**

ROE, which measures the profitability of own funds is negative due to the loss accrued.

ROI, which measures profitability from operations, was negative given the operating loss registered by the Group in the first half of 2017.

ROS, which represents average operating income per unit of revenue; in this case as well, the operating profit affected the value of this ratio, which is negative.

#### **SEGMENT REPORTING**

## **Economic performance by business sector**

The following table shows earning performance broken down by business segment. The data of the Group are presented with a breakdown into three segments (Numerical Controls - CNC -, High Speed Milling Systems - HSM -, and Service).

The last columns show those items that cannot be classified; these items are mainly general and administrative costs and costs for advertising, promotion and trade fairs incurred for all three business lines.

Inter-segment revenues consist of numerical controls, electrical control panels, drives and systems transferred from the electronics segment to the milling systems segment and of mechanical components and milling heads provided to the electronics segment for specific applications.

#### **RESEARCH & DEVELOPMENT**

R&D activities have always been one of the strengths of the Group and received substantial investment over the years. A team of 36 people, also supported by specialized consultants, is currently dedicated to R&D activities.

The costs incurred by the Group in the first half of 2017 amounted to about €1.1 million, equal to about 6.1% of revenues (€1.35 million in the first half of 2016 equal to about 5.0% of revenues), and were recorded mainly by the parent Fidia S.p.A.

Since the R&D activities are mainly carried out with internal resources, a substantial portion of the costs (about €1.0 million) is represented by personnel expenses.

The costs capitalized amounted to approximately €270 thousand.

Through its R&D activities, the Group pursues the objective of constantly adapting its products to the needs of its customers, of always being at the forefront of technological innovation in the reference product sector and of enhancing its knowledge not only in order to protect market sectors that are considered driving forces and have greater potential, but also with the objective of opening up new areas. Investment in R&D in recent years has enabled the Group to strengthen its presence in the aerospace sector and to receive orders for machinery for the processing of components for the energy industry and of innovative materials (e.g., carbon fibre and titanium), as well as of nonferrous materials (e.g. clay, used for modelling cars). Research covers both business lines of the Group.

In the **numerical controls and drives** sectors, the main R&D activities that characterized activities during the first half of 2017 were:

- Green Electric Drives novel structures for high performance drives From the last quarter of 2015 and for three years Fidia will be funding a scholarship commemorating for a PhD at the Polytechnic of Turin (PhD in Electrical, Electronics and Communications Engineering) titled: *Green Electric Drives novel structures for high performance drives.* The activity of the doctorate program will be followed by both academic and company tutors to ensure that the solutions developed can have a genuine impact on the future Xpower™ digital drive lines. This scholarship was funded to honour the memory of our engineer, Mario Vesco, Technical Director of the Numerical Control Division until his premature death on 18 March 2015.

  ViMill® Look-ahead Virtual Milling The development of new releases is underway with
- additional functions that increasingly respond to customers' needs to interface and integrate ViMill within production process management systems. More robust management of input and an improvement in both the pre-treatment of 3D models that are not always reliable and of the core libraries for graphical modeling complete the picture of an increasingly integrated, user-friendly and error-free software that is able to eliminate the risk of errors introduced by the operator.
- Axis Control and CNC Functions During the first half of 2017, the axis control logic was improved by acting on various aspects with the aim of improving quality, machining times of the parts produced and usability by those who schedule and manage production. Six versions of official software have been released and new branches have been opened in order to integrate more consistent improvements aimed at increasing the flexibility, usability and applicability of the FIDIA numerical control also in areas other than milling.
- HiMonitor SW suite designed to monitor the details of operations performed on machines equipped with FIDIA numerical control. It analyses actual machining times, downtime and key events during machining in order to monitor and identify issues and determine the maintenance required to achieve maximum efficiency. HiMonitor is FIDIA's answer to the demand for an integrated machine monitoring tool capable of improving workshop control and managing maintenance operations more carefully and effectively. It features remote machine status control via phone, tablet and PC.

HiMonitor is one of the solutions in line with the Industry 4.0 criteria that equip FIDIA numerical controls. In 2017 HiMonitor continues to play a leading role in the future as new

developments and functions will be released to meet the growing demands for monitoring and collecting production data. CPU-Z - The project aims to develop a new CPU board (called CPU10) in single board computer format based on a new concept of System On Chip (SoC) that integrates both multiple computing units based on ARM architecture and programmable logic. CPU10 represents a change of pace in the design of FIDIA products and is the new architectural solution that meets the growing demands of the market. The solution takes advantage of the high integration present in the new SoC families to provide better performance and products that are flexible/adaptable to the growing demands of the market. nCservice - The project aims to develop a set of tools and facilities for the maintenance, management and calibration of the machine tool. As already done for the operator interface, the new service tools will be developed with a modern style and will be able to make setup and maintenance operations simple. The project will cover different aspects of maintenance thanks to specific applications, such as: parameter oscilloscope, log file analyser, tools for the characterization and assessment of performance and new features in support of PLC development. SCX - XP SOFT CHARGE UNIT - New model of Power Supply, it is an object that together with one or more drives of the XPower series will function as a DC bus master that powers the drives of the motors in the machine. Using bus soft charge techniques avoids abrupt and potentially harmful transients and substantially reduces the noise and ripple current produced. In the high-speed milling systems sector, the Group has continued along the path pursuing an R&D strategy centred, on the one hand, on broadening its range of machines and on searching cutting-edge solutions for processing new materials and gaining access to new sectors and fields of application and, on the other, on the consolidation of cooperation with industry partners and customers through the co-development of new production technologies. The main projects that characterised the first half of 2017 were: □ New HTF (Horizontal Type FIDIA) series – The success of the GTF series has led us to enrich the portfolio of solutions by introducing the development of a new family of horizontal machines both for the machining of aeronautical parts in aluminium and titanium, and for the machining of style models. It is estimated that the first HTF series machines will be presented at the beginning of 2018. **D321** - In the course of the first half of 2017 the development of a new machine was started for the finishing of the moulds of the DIGIT series based on gantry architecture that will complement the current offering in the DIGIT series with open frame architecture. The first D321 machine will be presented at the EMO trade fair in Hanover. Series M5 milling heads - The set of milling heads saw the continued development of three new versions S, L and E in the first half of 2017. The modernizations of the components and

Finally, the Group's activities in the field of collaborative research continued in the first half of 2017 and a new project, coordinated by FIDIA, will be financed by the European Commission from 1 October 2017. FIDIA is also continuing the activity of preparing new project proposals with the objective to support and consolidate the level of product and process innovation that distinguishes the Group. The first half of 2017 saw the participation of Fidia in 2 projects co-funded by the

#### INTRA-GROUP RELATIONS AND RELATIONS WITH RELATED PARTIES

Relations among the Group's companies are governed at market conditions, considering the nature of the goods and services provided. These relations are basically of a commercial nature.

The Meeting of the Board of Directors on 11 November 2010 drew up and approved specific internal procedures called "Guidelines and rules of conduct on "extremely significant, atypical or unusual" transactions and with "related parties" ("Guidelines"). These procedures implement both the criteria of the Self-Discipline Code and the Regulation on related parties adopted by Consob Resolution No. 17221 of 12 March 2010 as amended by the following Consob Resolution No. 17389 of 23 June 2010.

These procedures can be found at the company website, www.fidia.com, under corporate governance in the Investor Relations section.

The manufacturing of milling systems, numerical controls, mechanical components and electrical systems is carried out entirely by Fidia S.p.A. following the mergers in previous fiscal years.

The foreign subsidiaries of Fidia, with the sole exception of Shenyang Fidia NC & M Co. Ltd., deal with the sales and servicing of the Group's products in the relevant markets and for this purpose they purchase these in general directly from the Parent Company. Intra-group sales relations are carried out based on transfer pricing applied in a continuous and uniform manner between companies. Supply relations are carried out based on normal market prices.

With regard to the subsidiary Shenyang Fidia NC & M Co. Ltd., it manufactures and sells numerical controls and milling systems designed by Fidia for the Chinese market. The strategic components are purchased from the parent company Fidia S.p.A. at normal market conditions and the remaining parts from local suppliers.

Based on the information received from the Group companies, there were no atypical or unusual transactions as defined by Consob.

Under Article 7.2(c) of the above-mentioned "Guidelines", in the first half of 2017 there were no transactions with related parties that can be defined as having "major relevance."

Pursuant to Consob Resolution No. 15519 of 27 July 2006, supplementary consolidated income statement, consolidated statement of financial position and statement of cash flow schedules were drawn up, which show the impact of related party transactions on the individual financial statement items.

# TRENDS IN GROUP COMPANIES

A brief overview of the performance of the Group companies during the first half is provided below. Data refers to the financial statements drawn up according to IAS/IFRS international accounting standards and all companies are consolidated with the line-by-line method.

# SIGNIFICANT EVENTS OCCURRING AFTER THE FIRST HALF AND BUSINESS OUTLOOK FOR THE CURRENT PERIOD

# Significant events occurring after the first half

It should be noted that on 14 July 2017 the Board of Directors evaluated a new organisational structure of the company and, in this regard, the General Manager and Vice Chairman Mr. Carlos Maidagan made available to the Board of Directors the proxies previously received in order to allow the best possible consideration of the decisions on the matter.

General Management and the position of Employer have been assigned to the Chairman and Chief Executive Officer, Mr. Giuseppe Morfino

Mr. Maidagan has been entrusted with two important commercial expansion projects: in Fidia Shenyang for the Chinese market and in Fidia GMBH for the German market.

#### **Business outlook**

The second quarter of the period closed with a significantly better result compared to the first, but it was still negative as was the first half as a whole.

On the commercial front, the performance achieved was very satisfactory in the first half of the year and this positive trend is continuing to date.

Machine deliveries were lower than expected in the first half of the year, but production planning supports the full-year revenue forecasts.

Based on these assumptions, the Group's management expects a substantial improvement in economic performance in the second half of the year.

During the first half business operations were conducted to support the Group's production capacity and the timeliness of deliveries, including through policies based on higher levels of inventory.

This, as well as the industrial building now in operation, will allow us to increase efficiency and production volumes adapting them to Group commercial results that are expected to be high in the current year.

The general economic situation is therefore expected to improve significantly during the second half of the year.

As a result of the above, the Group's net financial position was a debt of approximately €9.5 million, down from the end of last year, despite the fact that the company has the resources needed to meet its financial needs over the next twelve months.

## **Notes**

#### SIGNIFICANT ACCOUNTING STANDARDS

These Condensed Half-Year Consolidated Financial Statements at 30 June 2017 have been prepared in accordance with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and adopted by the European Union. The designation "IFRS" also includes all currently valid International Accounting Standards ("IAS"), as well as all interpretations of the International Accounting Reporting Interpretations Committee ("IFRIC"), formerly the Standing Interpretations Committee ("SIC").

These Half-Year Consolidated Financial Statements have been prepared in accordance with IAS 34 – Interim Financial Reporting, applying the same accounting standards used in the preparation of the Consolidated Financial Statements at 31 December 2016.

The preparation of the interim financial statements requires management to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities and the disclosure of contingent assets and liabilities at the date of the interim financial statements. If in the future such estimates and assumptions, which are based on management's best judgment at the date of this condensed Half-Year Report, deviate from the actual circumstances, the original estimates and assumptions will be modified as appropriate in the period in which the circumstances change.

For a more detailed description of the most significant valuation processes for the Group, reference should be made to the section "Use of estimates" in the consolidated financial statements at 31 December 2016.

It should also be noted that certain valuation processes, in particular the more complex ones, such as the determination of any impairment losses on non-current assets, are carried out in full only when the annual financial statements are drawn up, when all the information that may be necessary is available, except in cases where there are indications of impairment that require an immediate assessment of any impairment losses..

The Group carries out activities that historically show changes in total sales during the year and usually generate higher revenues in the second half than in the first half of the year.

Taxes have been determined on the basis of the best estimate of the best tax rate estimate expected for the whole financial year by each company included in the scope of consolidation.

The Group is exposed to financial risks associated with its operations: credit risk, liquidity risk, market risk (mainly foreign exchange and interest rate risks).

These Condensed Half-Year Consolidated Financial Statements do not include all the information and explanatory notes on financial risk management required in the preparation of the annual financial statements. For a detailed description of this information, refer to the consolidated financial statements of the Fidia Group at 31 December 2016, section of the Notes entitled "Risk Management", as well as to Note 31 of the Notes to the Financial Statements, entitled "Information on financial risks."

#### **Financial Statements**

The Group presents the statement of comprehensive income by nature of expenditure, which is deemed more representative compared to so-called presentation by function. The form chosen complies with the internal reporting and business management methods.

Within said statement of comprehensive income by nature, under the profit/(loss), a specific distinction has been made between profit/(loss) of ordinary business and those charges and earnings that are the result of non-recurrent transactions in ordinary business management, such as the restructuring expenses and any other atypical revenues/(charges), as these can be treated like the former. It is deemed that this allows for a better measurement of the actual performance of the normal business management, it being understood that any atypical expenses and earnings are specified in detail

The definition of atypical adopted by the Group differs from the one set by Consob Notice of July 28, 2006, by which atypical and/or unusual transactions are all those transactions whose significance/relevance, nature of the counterparts, subject-matter of the transaction, transfer pricing method and timing of the event (near year-end) can give rise to doubts on: correctness/completeness of information posted, conflict of interests, safeguard of company equity, safeguard of minority interests.

With reference to the statement of financial position, the "non-current and current" format of presentation has been adopted according to the provisions of IAS 1.

The cash flow statement was drawn up by applying the indirect method.

Finally, please be noted that with reference to Consob Resolution n° 15519 of July 27, 2006 on financial statements, supplementary schedules for the statement of comprehensive income, statement of financial position and cash flow statement were added in order to underscore significant relations with related parties and not to impair the overall readability of the financial statements.

#### Accounting principles, amendments and interpretations adopted from 1 January 2017

There are no standards and interpretations endorsed by the European Union and in force as of 01/01/2017.

# Accounting standards, amendments and interpretations not yet effective and not adopted in advance

The following are the standards and interpretations which, at the date of preparation of the financial statements, had already been issued but were not yet in force. The Company will adopt these principles when they enter into force.

Accounting standards and interpretations issued by the IASB and endorsed by the European Union

"IFRS 15 - Revenues from contracts with customers: on 29 October 2016, EU Regulation no. 2016/1905 was issued, which implemented at EU level IFRS 15 - Revenues from contracts with customers and related amendments. IFRS 15 replaces "IAS 18 - Revenue", "IAS 11 - Construction Contracts" and the related interpretations on the recognition of revenue, consisting of "IFRIC 13 - Customer Loyalty Programmes", "IFRIC 15 - Agreements for the Construction of Real Estate", "IFRIC 18 - Transfers of Assets from Customers" and "SIC 31 - Barter Transactions Involving Advertising Services". The application of the new standard from 1 January 2018 involves, alternatively, a method for restating all the comparative periods presented in the financial statements ("complete retrospective method") and a "simplified method" that involves the recognition of the cumulative effect of the first

application of the standard as an adjustment to the opening balance of shareholders' equity for the annual period in which the new standard is adopted, leaving the figures for all the comparative periods presented unchanged. The new standard, which involves recording revenues upon transfer of control of goods or services to customers at an amount that reflects the amount expected to be received in exchange for such products or services, introduces a methodology divided into five steps to analyse the transactions and define the methodology of recording revenues with reference both to the timing of detection ("point in time" / "over time"), and to their amount. The Group plans to adopt the new standard from the mandatory date of adoption. The valuation of the effects deriving from the application of IFRS 15 is in progress. At present, it is believed that the adoption of this standard will not have a significant impact on the recognition and measurement of revenues.

"IFRS 9 - Financial Instruments": on 29 November 2016, EU Regulation no. 2016/2067 was issued, which implemented at EU level "IFRS 9 - Financial Instruments" with regard to the classification, measurement and derecognition of financial assets/liabilities, impairment of financial instruments, and hedge accounting. IFRS 9, which must be applied as from 1 January 2018, (i) modifies the model for the classification and measurement of financial assets; (ii) introduces the concept of expected credit losses among the variables to be considered in the valuation and impairment of financial assets; and (iii) modifies the provisions of hedge accounting. The Group expects that the adoption of this standard will not have a significant impact on its financial statements.

Accounting standards and interpretations issued by the IASB and not yet endorsed by the European Union

- "IFRS 16 Leases", applicable from 1 January 2019 with the complete or simplified retrospective approach described above with reference to IFRS 15. IFRS 16 replaces "IAS 17 Leases" and the related interpretations "IFRIC 4 Determining Whether an Arrangement Contains a Lease", "SIC 15 Operating Leases Incentives", "SIC 27 Evaluating the Substance of Transactions in the Legal Form of a Lease". From the lessee's point of view, IFRS 16 requires all leases, regardless of whether they are operating or finance leases, to be recorded in the balance sheet as a liability, represented by the present value of future lease payments, against the recognition under assets of a right to use the asset leased. Leasing contracts lasting 12 months or less and leases of low-value assets may be excluded from the application of IFRS 16. The Group is evaluating the impact that the new standard will have on the accounting treatment of its lease contracts. At the moment it is expected that the adoption of this standard will not have a significant impact on its financial statements, in the absence of operating leases for significant amounts.
- Amendments to IAS 7 Statements of Cash Flows: Disclosure Initiative. The changes concern the disclosures that companies will have to provide to enable investors to assess changes in liabilities arising from financing activities. The new provisions will be applicable for annual periods beginning on or after 1 January 2017, except for any subsequent deferrals following the endorsement by the European Union of the amendments to the standards, which has not yet taken place at the date of these interim financial statements.
- Amendments to IAS 12 Income taxes: Recognition of Deferred Tax Assets for Unrealised Losses. The changes made provide clarifications in relation to the recognition of deferred tax assets relating to debt instruments measured at fair value. The new provisions will be applicable for annual periods beginning on or after 1 January 2017, except for any subsequent deferrals following the endorsement by the European Union of the amendments to the standards, which has not yet taken place at the date of these interim financial statements.
- Amendments to IFRS 2 Classification and measurement of share-based payments, applicable from 1 January 2018.

- Clarification of IFRS 15 Revenues from Contracts with Customers", applicable from 1 January 2018.
- Improvements to IFRSs (2014-2016 cycle) Amendments to IFRS 12 and IAS 28, applicable from 1 January 2017 and 1 January 2018, respectively.
- IFRIC 22 Foreign Currency Transactions and Advance Consideration issued, applicable from 1 January 2018.
- Amendments to IAS 40 Investment Property, applicable from 1 January 2018.
- IFRIC 23 Uncertainty over Income Tax Treatments, applicable from 1 January 2019.
- Amendments to IFRS 10 Consolidated Financial Statements and to IAS 28 Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture, whose application is deferred indefinitely.

#### Scope of consolidation

The scope of consolidation has not changed in the first half of 2017 in comparison to the Consolidated Financial Statements at 31 December 2016. The companies included in the scope of consolidation, compared with those resulting at the end of 2016 and at the end of the same period of last year, are listed below:

The scope of consolidation has changed with respect to the consolidated financial statements at 30 June 2016 due to the acquisition in the second half of 2016 by the Parent Company of a further 4% of the subsidiary Beijing Fidia Machinery & Electronics Co., Ltd; the final equity investment has increased from 92% to 96%.

#### **OTHER INFORMATION**

The condensed consolidated half-year financial statements at 30 June 2017 were approved by the Board of Directors on 14 September 2017, which authorized their publication on the same date.

## **COMPOSITION AND MAIN CHANGES**

#### **INCOME STATEMENT**

## 1. NET SALES

The breakdown by segment of net revenues from third parties (net of intragroup items) is shown in the following table:

| (€thousand)                             | 1st Half 2017 | %     | 1st Half 2016 | %     |

| -8.9%  |  |
| -35.8% |  |

#### 2. OTHER REVENUES AND INCOME

Other revenues and earnings in 1st half 2017 were equal to €1,143 thousand (€978 thousand in the same period of 2016). This figure includes the other revenues from ordinary activity, but that cannot be included in the typical sale of goods and services.

This item includes:

- release of the warranty, bad debts and/or any accruals in excess of the risk to be covered (€468 thousand versus €296 thousand at 30 June 2016);
- increases in tangible assets built on a time and materials basis and the capitalization of product development costs (€283 thousand versus €180 thousand at 30 June 2016);
- recovery of costs, contingent assets and other sundry revenues (€252 thousand; €231 thousand in the same period of last year).
- research grants from the EU and Italian Ministry of Education, University and Research (MIUR) as part of the funded research activity carried out by the parent company Fidia S.p.A. (€134 thousand, €264 thousand at 30 June 2016);
- capital gains from disposals of tangible assets (€6 thousand versus €7 thousand at 30 June 2016).

## 3. RAW MATERIALS AND OTHER CONSUMABLES

These are:

| (€thousand)                                       | 1st half 2017 | 1st half 2016 |
|---|---------------|---------------|
|   |               |               |
| Production materials                              | 7.165         | 11.591        |
| Service materials                                 | 495           | 649           |
| Consumables                                       | 47            | 79            |
| Equipment and software                            | 27            | 26            |
| Packaging   | 86            | 131           |
| Others  | 72            | 64            |
| Change in inventory raw materials and consumables | 655           | (1.370)       |
| Total   | 8.547         | 11.170        |

In the first half of 2017, raw materials and other consumables, amounting to €8,547 thousand, decreased YOY (€11,170 thousand) due to lower revenues realised.

## 4. PERSONNEL EXPENSES

Personnel costs show an increase of €170 thousand compared to the first half of 2016 (+1.93%) and amounted to €9,001 thousand against €8,831 thousand in the corresponding period of 2016. These amounts are detailed below:

| (€thousand)              | 1st half 2017 | 1st half 2016 |
|--------------------------|---------------|---------------|
|                          |               |               |
| Wages and salaries       | 6.780         | 6.669         |
| Social security charges  | 1.861         | 1.852         |
| TFR                      | 229           | 219           |

|                   | Total | 340       | 341        | 11          | (14)         | 0          | 338           | 340,5                 |

## 5. OTHER OPERATING COSTS

Other operating costs are detailed as follows:

| (€thousand)                           |       | 1st half 2017 | 1st half 2016 |
|---------------------------------------|-------|---------------|---------------|
|                                       |       |               |               |
| Contractors                           |       | 1.241         | 2.099         |
| Bonuses and commissions               |       | 155           | 664           |
| Production costs                      |       | 2.297         | 2.560         |
| Commercial expenses                   |       | 537           | 450           |
| Research & Development                |       | 202           | 284           |
| Overheads and administrative expenses |       | 2.765         | 2.770         |
|                                       | Total | 7.197         | 8.827         |

Other operating costs amounted to €7,197 thousand and are therefore down by approximately €1,630 thousand compared to the first half of 2016. The trend is mainly due to lower production and commercial expenses.

## 6. DEPRECIATION, AMORTIZATION AND WRITEDOWNS

| (€thousand)                                   | 1st half 2017 | 1st half 2016 |
|---|---------------|---------------|
|   |               |               |
| Amortization of property, plant and equipment | 321           | 272           |
| Amortization of intangible fixed assets       | 104           | 53            |
| Bad debts                                     | 99            | 82            |
| Total   | 523           | 407           |

During the first half, approximately €99 thousand of trade receivables were written down by the parent company and its subsidiaries.

Amortisation and depreciation of tangible and intangible fixed assets increased by approximately €100 thousand, in relation to the start in the second half of 2017 of the amortisation of two development projects (€54 thousand) and the new building in Forlì (€31 thousand).

#### 7. NON-RECURRING REVENUE

In the first half of 2017, there were no non-recurring revenue or expenses.

## 9. INCOME TAX

The following table shows the taxes allocated in the Consolidated Income Statement:

| (€thousand)  | 1st half 2017 | 1st half 2016 |  |
|--|---------------|---------------|--|
|  |               |               |  |

| Total current taxes                                  | 167           | 476           |  |
| Pre-paid taxes absorbed                              | 102           | 323           |  |
| Prepaid taxes  | (55)          | (82)          |  |
| Deferred taxes                                       | 1             | 1             |  |
| Deferred taxes absorbed                              | (3)           | (3)           |  |
| Total  | 212           | 715           |  |

Current taxes at 30 June 2017 are zero because the parent company has a tax loss for both IRES and IRAP purposes.

At 30 June 2017, the net balance between prepaid taxes and deferred tax liabilities incurred by the individual consolidated companies is made up as follows:

| (€thousand)              | 30 giugno 2017 | 31 dicembre 2016 |
|--------------------------|----------------|------------------|
|                          |                |                  |
| Deferred tax assets      | 776            | 850              |
| Deferred tax liabilities | (49)           | (51)             |
|                          |                |                  |
| Total                    | 727            | 799              |

Deferred tax assets amounted to €776 thousand and are down

compared to year-end. For these assets, mainly generated by temporary differences in assets and liabilities, tax losses and consolidation adjustments, recovery on the basis of the budget and forecasts for the following years is considered probable.

## 10. EARNING PER SHARE

At 30 June 2017, the share capital of Fidia S.p.A. consisted of 5,123,000 ordinary shares with the same rights at the time of distribution of profits and is unchanged with respect to paragraph 20 of the Consolidated Financial Statements at 31 December 2016.

The calculation of the earnings per share is based on the following data:

|                                       |           | 1st half 2017 | 1st half 2016 |
|---------------------------------------|-----------|---------------|---------------|
| Net earnings pertaining to Group      | €thousand | (2.694)       | 1.230         |
| Profit/(loss) of ordinary shares      | €thousand | (2.694)       | 1.230         |
| Number of circulating ordinary shares | number    | 5.113.000     | 5.113.000     |
| Base earnings per share               | EUR       | (0,53)        | 0,24          |
| Diluted earnings per share            | EUR       | (0,53)        | 0,24          |

No difference has been recorded between the base earnings per share and diluted result per share as Fidia S.p.A. does not have any equity instruments with dilutive effects.

## STATEMENT OF FINANCIAL POSITION

## 11. PROPERTY, PLANT AND EQUIPMENT

The table below shows the changes in property, plant and equipment during the first half of 2017:

| (€thousand)                       | Land and buildings | Total plant,<br>machinery<br>and<br>equipment | Other<br>assets | Assets under construction and advances | Total  |

Capital expenditure made in the first half of 2017 amounted to approximately €1,547 thousand. Work in progress refers to a plot of land with adjoining industrial building under construction, that the parent company Fidia S.p.A. acquired, through lease, in 2014. This investment became ready for use on June 1 and was depreciated from that date.

At 30 June 2017, there were no assets encumbered by guarantees or other constraints that could limit their full availability.

## 12. INTANGIBLE FIXED ASSETS

The table below shows the changes in intangible fixed assets during the first half of 2017:

| (€thousand)                              | Development costs | Licenses | Software | Assets<br>under<br>development | Total |
|--|-------------------|----------|----------|--------------------------------|-------|

| Currency gain/(loss)                     |                   | (1)      |          |                                | (1)   |
| Closing net carrying amount at 30/6/2017 | 486               | 49       | 126      | 846                            | 1.508 |

Increases in the first half of 2017 amounted to €275 thousand and mainly refer to development costs incurred and capitalized (€271 thousand) not yet amortised as not yet completed and therefore the projects to which they refer have not started yet to produce the related benefits.

During the first half of 2017, a development project for a total amount of €288 thousand was completed and therefore amortised with the project completed at the end of the previous year.

All costs of research (both basic and applied) are instead charged to profit or loss in the year they are incurred.

Based on the growth in order acquisition and the recovery forecasts expected in the second half of the year, no impairment indicators have been identified in relation to the value of development costs.

#### 13. EQUITY INVESTMENTS

This item, amounting to €16 thousand and unchanged compared to 31 December 2016, is made up of investments in associated companies valued at equity and investments in other companies valued at cost.

#### 14. OTHER NON-CURRENT RECEIVABLES AND ASSETS

The other non-current receivables and assets are detailed below:

| (€thousand)                       | Balance<br>30/06/2017 | Balance<br>31/12/2016 |
|-----------------------------------|-----------------------|-----------------------|

| Non-recurring trade receivables   | 121                   | 160                   |
| Receivables for foreign VAT       | 9                     | 6                     |
| Withholding tax on foreign income | 688                   | 690                   |
| Multi-year pre-paid expenses      | 5                     | 22                    |
| Other non-current receivables     | 3                     | 6                     |
| Total                             | 890                   | 968                   |

The decrease of €78 thousand compared to the balance at 31 December 2016 is due to normal transactions related to the business.

Withholding tax receivables on foreign income consist of receivables claimed by Fidia S.p.A. with tax authorities for final withholding tax on wages for technical training activities carried out by the parent company on behalf of the subsidiary Shenyang Fidia NC&M Co. Ltd. in prior fiscal years. These receivables are recoverable through the realisation of taxable income such as to allow an excess of Italian tax over foreign tax within a maximum of five years.

The value of these receivables is adjusted by a bad debt provision of €579 thousand recognised in previous years and which has not changed during the period.

#### **15. INVENTORY**

The breakdown of the item is illustrated in the following table:

|   | Balance    | Balance    |
|---|------------|------------|
| (€thousand)                                   | 30/06/2017 | 31/12/2016 |

|   |            |            |
| Net value                                     | 22.406     | 19.375     |

Inventory at the end of the first half of the year was approximately €3,030 thousand higher than at 31 December 2016. The increase is mainly due to the higher stock of work in progress resulting from a different state of production progress compared to the end of last year; on the other hand, the stock of raw materials decreased, in line with expectations.

The provisions for depreciation equivalent to €2,501 thousand (€2,430 thousand at 31 December 2016) were reported to hedge the non-utilisation of some components in period under consideration; these phenomena result, in particular, from the need to ensure customers that spare parts are available for servicing even beyond the period of ordinary marketability of the components.

Below follows the detail of the changes in the provisions for raw materials and finished products depreciation in the first half of the year:

| (€thousand)                                   | Balance<br>31 December<br>2016 | Accrual/<br>(utlization) | Exchange rate effect | Balance<br>30 giugno<br>2017 |

| Trade receivables from others Taxed supplementary Receivables from associates | 9.600<br>(705)        | 15.502<br>(705)       |
| Tota  | 8.895                 | 14.797                |

Gross trade receivables decreased by approximately €5,902 thousand compared to 31 December 2016; this change is mainly due to the different trend of revenues in the two periods under comparison.

The bad debt provisions, amounting to €705 thousand (€705 thousand at 31 December 2016) were allocated to cover the risk of default related to doubtful and overdue receivables.

The changes in the bad debt provision (€ thousand) are illustrated below:

| Balance at 31 December 2016                           | 705                |

The change in Other pre-paid expenses is mainly due to costs relating to future commercial exposures, amounting to approximately €189 thousand.

There are no receivables due beyond five years.

## 18. OTHER CURRENT FINANCIAL ASSETS

This item amounts to €21 thousand, due to the fair value of forward contracts for the sale of USD entered into to reduce the risk associated with exchange rate fluctuations. The evaluation, as for other derivatives in place, has been performed according to the market parameters at the reporting date of the quarter.

#### 19. CASH AND CASH EQUIVALENTS

The overall amount of cash of the Group amounted to €9,642 thousand (€8,925 thousand at 31 December 2016) and consisted of temporary cash in bank deposits pending future use. It is deemed that their carrying amount is aligned to the fair value at the reporting date.

The related credit risk is not material too, because the Group operates with primary national and international banks.

#### 20. SHAREHOLDERS' EQUITY

Consolidated shareholders' equity amounts to €14,174 thousand, down €4,764 thousand on 31 December 2016 due to the combined effect of the loss for the period (-€2,772 thousand), the dividends resolved upon by the latest shareholders' meeting (-€1,023 thousand) and the recognition of actuarial gains on staff termination benefits (+€16 thousand, net of the tax effect estimated at approximately €5 thousand), the fair value valuation of hedging derivatives set aside in the cash flow hedge reserve (+€2 thousand, net of the tax effect of approximately €1 thousand), the effect of exchange rate fluctuations on the translation of the financial statements of subsidiaries denominated in currencies other than the euro (-€993 thousand) and other minor changes (€6 thousand).

Tax effect pertaining to Other profit/(loss) consisted of:

At 30 June 2017, the fully paid share capital was unchanged compared to 31 December 2016 and consisted of 5,123,000 ordinary shares with a nominal value of €1 each, totalling €5,123,000.

For more complete disclosure on the Company's share capital, see Note 20 to the consolidated financial statements at 31 December 2016.

Own shares consisted of 10,000 ordinary shares issued by Fidia S.p.A. for a value of €45 thousand (unchanged from 31 December 2016).

#### 21. OTHER NON-CURRENT PAYABLES AND LIABILITIES

This item, which amounts to €79 thousand (€89 thousand at 31 December 2016) and includes €68 thousand in medium/long-term payables to the personnel of the French subsidiary Fidia Sarl plus other minor items.

#### 22. TERMINATION BENEFITS

Termination benefits reflects the residual obligation of Fidia S.p.A., the only Italian company in the Group, relating to the indemnity paid to employees and settled upon termination of employment. Under certain conditions, employees may receive a partial advance on those benefits while they are still in the Company's employ. It is an unfunded defined benefit plan.

Changes in the termination benefits are illustrated in the table below (€ thousand):

| Balance at 31 December 2016                                | 2.330 |
|--|-------|
|  |       |
| Amount accrued and allocated in period                     | 229   |

| Amount transferred to State Fund and complementary pension | (224) |
| scheme   | (227) |
| Substitute tax   | (5)   |
| Borrowing costs on termination benefits                    | 6     |
| Accounting of actuarial losses                             | (21)  |
| Balance at 30 June 2017                                    | 2.282 |

The interest on charges relating to the defined benefits plans for employees are comprised under finance costs, hence leading to an increase in finance costs for the period in the amount of about €6 thousand.

Termination benefits are calculated based on the following actuarial assumptions:

|  | At 30<br>June<br>2017 | At 31<br>December<br>2016 |
|--|-----------------------|---------------------------|
| Discount rate (*)  | -0,03%                | -0,22%                    |

The discount rate on future benefits is determined, according to the provisions of IAS 19, at market yields; The structure in interest rates used refers to the EUR Composite rates having an AA rating. The rate used was the one with an average financial duration equal to the average financial duration of benefits for the communities under consideration.

## 23. OTHER NON-CURRENT FINANCIAL LIABILITIES

This item amounts to €20 thousand (€23 thousand at 31 December 2016) and consists of the fair value of four interest rate swap and two interest rate cap contracts signed in order to cover the risk on interest rate change on four medium/long-term loans (cash flow hedge).

# 24. CURRENT AND NON-CURRENT FINANCIAL LIABILITIES

Financial liabilities amounted to €19,126 thousand as per the schedule.

This is the "under construction" property lease agreement, the repayment of which will take place in 179 monthly instalments starting from the date on which the industrial building will be ready for use. Until that date, the user, Fidia S.p.A., will not refund the principal instalments (excluding the initial maxi-instalment, amounting to €2,380 thousand, paid on signing of the lease and relevant addenda).

It is deemed that the book value of fixed and floating rate financial liabilities at the reporting date is a reasonable estimate of their fair value.

## 25. OTHER CURRENT FINANCIAL LIABILITIES

This item amounted to €0 thousand and normally includes the fair value loss of certain contracts for the forward sale of USD entered into by the parent company Fidia S.p.A. to hedge the exchange rate risk on certain supplies denominated in that currency.

At 31 December 2016, this item totalled €198 thousand.

Payables to personnel refer mainly to accrued holiday pay and deferred payment of wages and salaries; the change compared to 31 December 2016 is due to the accrual during the year of indemnities (typically 13th month's salary) which are paid at the end of the period.

Advances from customers include advances from customers for orders yet to be processed and for sales of milling systems already delivered but still pending completion, which according to IAS 18 – Revenue, cannot be stated in the revenue.

#### 28. PROVISIONS FOR RISKS AND CHARGES

Provisions for risks and charges amounted to €1,037 thousand, of which €1,011 thousand (€1,453 thousand at 31 December 2016) for the short term, and €26 thousand for the long term (€39 thousand at 31 December 2016). This item refers to

- €945 thousand for the warranty provision, which represents the best estimate of the commitments undertaken by the Group by contract, by law or custom, in relation to charges related to the warranty on its products for a certain period starting from their sale to the end customer:
- €83 thousand to a provision set aside by the subsidiary Fidia Co and parent company for legal risks;
- €9 thousand to a provision set aside for tax disputes.

#### 29. GUARANTEES GRANTED AND OTHER CONTINGENT LIABILITIES

#### Sureties issued on behalf of others

At 30 June 2017, sureties issued on behalf to third parties totalled €788 thousand (€2,800 thousand at 30 June 2016).

This item consists primarily of performance bonds for commercial transactions with the Parent Company's foreign customers for advances received on future supplies and for the correct fulfilment of contractual obligations during the warranty period.

## **Contingent liabilities**

Although the Fidia Group is subject to various types of risks (product, legal and tax liability) at 30 June 2017, it is not aware of any other facts, other than those covered by specific provisions present in these financial statements, which could generate foreseeable or estimated potential liabilities and consequently does not deem it necessary to make any further provisions.

The last columns show those items that cannot be classified; these items are mainly general and administrative costs and costs for advertising, promotion and trade fairs incurred for all three business lines.

Inter-segment revenues consist of numerical controls, electrical control panels, drives and systems transferred from the electronics segment to the milling systems segment and of mechanical components and milling heads provided to the electronics segment for specific applications.

Segment assets consist of operating assets that are used by the segment in the performance of its operations and are directly attributable or reasonably allocable to the segment. These assets do not include income tax assets.

Segment liabilities consist of operating liabilities that arise from the performance of the segment's operations and are directly attributable or reasonably allocable to the segment. These liabilities do not include income tax liabilities.

#### 32. FAIR VALUE HIERARCHIES

IFRS 13 establishes a fair value hierarchy that classifies the inputs of the valuation techniques adopted to measure fair value into three levels. The fair value hierarchy gives the highest priority to listed (unadjusted) prices in active markets for identical assets or liabilities (Level 1 data) and the lowest priority to non-observable inputs (Level 3 data). In some cases, the data used to measure the fair value of an asset or liability could be classified in different levels of the fair value hierarchy. In such cases, the fair value measurement is classified entirely at the same hierarchy level in which the lowest level input is classified, considering its importance for valuation. The hierarchy levels are:

Level 1 - listed prices recognised on an active market for identical assets or liabilities subject to valuation that the entity can access at the measurement date;

Level 2 - Fair values measured using valuation techniques for which inputs significant to the fair value measurement are based on observable market data;

Level 3 – inputs that are not based on observable market data.

At 30 June 2017, the Group held financial liabilities measured at fair value represented by derivative financial instruments to hedge interest rate risk, for an amount of €23 thousand and net financial liabilities at fair value represented by derivative financial instruments to hedge the exchange rate risk, for an amount of €21 thousand, classified within Level 2 of the hierarchical assessment of fair value.

During the first half of 2017, there were no transfers of assets and liabilities from one level to another.

#### 33. RELATED-PARTY TRANSACTIONS

The Group is engaged in transaction with associated companies and other related parties on commercial terms that are normal in the respective markets considering the characteristics of the goods and services involved.

In detail such transactions have been the following:
