

LINEA S

The Compact Gantry for Aerospace

FIDIA 

LINEA-S

AEROSPACE

The **"LINEA"** series of milling machines follows the success of the linear motors machine introduced by Fidia in 2019. Based upon the well-known and highly regarded GTF gantry range, Fidia presents a new approach to dynamics and a winning quality-performance-price ratio.

The modular construction design allows for three X-stroke sizes, complemented by a range of milling heads and dedicated accessories.

Characterized by high dynamic precision in continuous 5-axis interpolation, the machines are equipped with the ACL adaptive control standard feature equipping all Fidia CNCs.

The **LINEA-S** model is specifically designed for machining structural avionics components in aluminium alloys and is also available with Siemens CNCs: "Sinumerik ONE - the first digital-native CNC on the market". All machines comply with European directives, qualifying for Industry 5.0 tax incentives.

Layout

Fidia offers THREE versions of the **LINEA S: S3, S4, S6**

The **S** model, with its workpiece table made in cast iron, independent of the side walls and anchored to the foundation, offers the possibility to adjust the clearance under the head according to production needs.

Axis travel	Linea-S3	Linea-S4	Linea-S6
X (mm)	2.200 (86")	4.500 (177")	6.200 (244")
Y (mm)	3.000 (118")	3.000 (118")	3.000 (118")
Z (mm)	1.250 (49")	1.250 (49")	1.250 (49")

Numerical Control

Available with FIDIA **C20/C20-Vision** control or **SIEMENS** "SINUMERIK ONE"

Project Modularity

LINEA offers three sizes of X-axis travels, milling heads, and accessories for molds, aerospace, and composites.

Time Reduction

Reduced setup times for quick operational readiness.

Siemens CNC Available

Available with Siemens CNC "Sinumerik ONE" to meet specific requirements.
